

## HOTEL DATABASE

1. Create a database table in Access using the following information and save it as **HOTEL BY {YOUR NAME}**.

Name	Area	Star Rating	Single Rate	Double Rate
Chancellor Hotel	Downtown	2	60.00	64.00
Fairmont Hotel & Tower	Downtown	5	90.00	120.00
Holiday Inn Financial District	Downtown	4	78.00	110.00
Hyatt Regency	Downtown	4	130.00	155.00
Sir Francis Drake	Downtown	3	85.00	100.00
Holiday Inn Fisherman's Wharf	Northern	3	83.00	96.00
Lombard Hotel	Northern	2	55.00	65.00
Clarion Hotel	Southern	3	70.00	87.00
Ramada Inn Burlingame	Southern	3	65.00	73.00
Sheraton Inn-Airport	Southern	3	84.00	96.00
Campton Palace Hotel	Downtown	4	140.00	140.00
Best Western Americana	Northern	3	56.00	61.00
Holiday Inn Union Square	Downtown	4	100.00	115.00
Cathedral Hill Hotel	Northern	3	75.00	85.00
The Vagabond Inn	Southern	3	53.00	53.00
Hyatt on Union Square	Downtown	4	125.00	150.00
Marriott Burlingame	Southern	4	78.00	85.00
Royal Pacific Motor Inn	Downtown	3	59.50	59.50
Beck's Motor Lodge	Northern	2	45.00	52.00
Sheraton Palace Hotel	Downtown	3	90.00	105.00
{your last name} Hotel	Downtown	5	115.00	125.00

2. Sort the Hotel Database by Hotel name in alphabetical order (From A to Z).
3. Print out the table.
4. Create a query to find all the hotels in the Downtown (=Downtown) **Area**.
5. Print the dynaset.
6. Create another query to find the hotels that have a **Star Rating** greater than 3 (>3).
7. Print the dynaset.
8. You should have 3 print outs. Make sure your name is on all 3 print outs. Staple the print outs together and hand them in.
