	Min						

2. Go to each school's website to fill in the empty cells of your workbook.
3. Add a column at the end with a statistic that isn't there (number of sports victories this year, number of jobs available, number of miles the district covers, etc.)
4. Add two columns between # of Elementary Schools and # of Students (approximately G & H)--one for Total Of Schools and one for Average Schools.
5. Calculate the Total of Schools and Average Schools for each district (new columns).
6. Find total, average, max and min for the number of high schools, junior high schools, etc.
7. Add your name somewhere on this page in WORD ART.
8. Add a header with the date and MONROE SCHOOLS
9. Save as MONROE SCHOOLS. Then, print values and formulas.
